TECHNOLOGY & SIZING

Elastic Interface Technology® (EIT)

The proven standard in cycling insert technology offering a multi-layer structure, high density open cells with elastic memory, seamless thermo shaping for freedom of movement, permanent anti-microbial protection and anti-wrinkle system for reduced friction and easy care

Corsa EIT Insert

Elastic one-piece construction with varying thickness, perforated open cells for maximum air flow, anti-microbial micro-fiber composed of silver ion threads and enhanced perineal channel for additional comfort

Application: Short to Intermediate distance

Anatomic-L HD Carbon EIT Insert

Elastic two-piece anatomic construction with varying densities (High 14mm, Medium 8mm and Low 3mm), anti-microbial micro-fiber composed of carbon threads and enhanced thermo shaping for both perineal and ischia zone protection

Application: Intermediate to Long Distance

D-4 EIT Insert

Elastic one-piece construction with varying thickness, perforated open cells, anti-microbial micro-fiber composed of silver ion threads and enhanced perineal channel and top for additional comfort and protection

Application: Intermediate to Long distance

Anatomic-DP EIT Insert

Next-generation in elastic chamois technology featuring a two-piece anatomic construction with varying densities (High 8mm, Medium 6mm), anti-microbial micro-fiber composed of silver ion threads and slim form factor for enhanced freedom of movement

Application: Intermediate to Long distance

Anatomic-DP Carbon EIT Insert

Next-generation in elastic chamois technology featuring a two-piece anatomic construction with varying densities (High 8mm, Medium 6mm), anti-microbial micro-fiber composed of carbon threads and slim form factor for enhanced freedom of movement

Application: Intermediate to Long distance

Anatomic-4G Carbon EIT Insert

Next-generation in elastic chamois technology featuring a two-piece anatomic construction with varying densities (Ultra High 10mm, High 8mm, Medium 6mm and Low 4mm), anti-microbial micro-fiber composed of carbon threads and enhanced thermo shaping for both perineal and ischia zone protection

Application: Intermediate to Long distance

Elastic Interface Technology® (EIT)

The proven standard in cycling insert technology offering a multi-layer structure, high density open cells with elastic memory, seamless thermo shaping for freedom of movement, permanent anti-microbial protection and anti-wrinkle system for reduced friction and easy care

Women's Performance EIT Insert

Elastic one-piece construction with varying densities (High 10mm, Medium 7mm and Low 5mm), perforated open cells, anti-microbial micro-fiber composed of silver ion threads and women's specific, anatomical thermo shaping for greater comfort and freedom of movement

Application: Short to Intermediate distance

Women's Veloce HD EIT Insert

Elastic one-piece construction with varying densities (High 12mm, Medium 8mm and Low 3mm), anti-microbial micro-fiber composed of silver ion threads and women's specific, anatomical thermo shaping for greater comfort and freedom of movement

Application: Intermediate to Long distance

Women's Giro HD Carbon EIT Insert

Elastic one-piece construction with varying densities (High 14mm, Medium 8mm and Low 3mm), anti-microbial micro-fiber composed of carbon threads and women's specific, anatomical thermo shaping for greater comfort and maximum protection

Application: Intermediate to Long distance

Multi-sport EIT Insert

Elastic one-piece construction with uniform thickness (3mm) and non-perforated open cells, designed specifically for multi-sport activity requiring a minimal form factor and maximum freedom of movement

Application: Short to Long Distance

TECHNOLOGY

JERSEY

Drop

Dual-knit, tear drop style knit with proven moisture management and sublimation properties

Micro Quattro

Classic micro-quattro with a supple feel and exceptional moisture transfer properties

Sphere TX

Dual-layer, hydrophobic polyester with an inner weave for moisture absorption and an outer sphere knit for efficient transfer

HydroDrop

Supple, multi-directional stretch micro-fiber containing an active hydrophilic treatment for rapid moisture transfer

Silver

Quick drying, dual knit micro-fiber with visible silver thread positioned near the arm pit and side panel for increased breathability and effective anti-bacterial protection

Carbon E

Quick drying, dual knit micro-fiber with a visible carbon thread that improves moisture transfer while providing effective UV and anti-microbial protection

HSC

High gauge, compact, lightweight micro-fiber offering a balanced, multi-directional stretch and superior moisture transfer properties

Dual-Ply Power V

Combination of high compression Power Lycra® and supple V-Mesh bonded together and laser cut for unmatched performance and breathability

BIB SHORT / SHORT

Power Lycra®

Premium stretch fiber providing incomparable fit, muscle support, breathability and freedom of movement

V-Mesh

Lightweight, breathable, 360° stretch with a smooth texture providing unmatched comfort and support

HG Lycra®

High gauge Power Lycra® offering superior muscle compression, abrasion resistance and moisture transfer

Dual-Layer Power

Unique combination of high compression Power Lycra® bonded together and laser cut for unmatched performance and comfort

Carbon Lycra®

High gauge Power Lycra® with visible carbon thread for increased moisture transfer, anti-bacterial properties and UV protection

Dual-Ply Power V

Combination of high compression Power Lycra® and supple V-Mesh bonded together and laser cut for unmatched performance and breathability

Coldblack®

Patented finishing technology applied to our HG Lycra® which reduces heat build-up and provides effective protection from UV rays

Meryl ActiSystem®

High performance micro-fiber that holds and maintains its shape while providing anti-bacterial and effective UV protection

TECHNOLOGY

ACCESSORY / BASE LAYER / OUTERWEAR

Merino Wool

Premium yarn chosen for its rich texture and superior craftsmanship, pre-shrunk for easy care and a lifetime of comfort

Stretto

Soft polyester filament with a rib channeled face for rapid moisture transfer and abrasion resistance

Compact RS

Lightweight, extremely compact Ripstop micro-fiber providing both wind and water protection

Wind ST

Breathable polyester circular gauge knit designed to stretch while offering both wind and water resistance

Super Roubaix®

The standard in lightweight, form-fitting, insulating fabrics

Element 4

Multi-layer fabric combining 100% breathability, all-way stretch, minimal weight and both wind and water protection

Clarino™

Supple, form fitting micro-fiber providing maximum performance, comfort and durability

Pittards®

Unique combination of comfort and superior grip while resistant to both moisture and abrasion

TECHNOLOGY

SOCK

Tactel®

Designed specifically for use in active apparel offering the best in performance, protection, fit and comfort

Coolmax®

Original performance fabric proven in its ability to transfer moisture away from your skin leaving you dry and comfortable

Meryl SkinlifE®

Engineered and tested specifically for garments that come in close contact with the skin naturally eliminating bacteria while providing both comfort and performance

Resistex® Carbon

Unique in its ability to dissipate static electricity, regulate heat and naturally eliminate bacteria

Lenpur™

Made from 100% cultivated wood fiber offering excellent thermo regulation and natural anti-bacterial protection

Dryarn®

Advanced polypropylene micro-fiber offering exceptional moisture transfer, minimal weight, soft feel and anti-bacterial protection

ThermoCool™

Unique blend of fibers with a hollow core for unmatched moisture transfer and anti-bacterial protection

Olefin®

Proven, lightweight fiber offering excellent moisture transfer, abrasion resistance and high-gauge construction

Cordura®

Three times more durable than standard polyester offering unmatched resistance to abrasion, tears and moisture
